

ENVIRONMENTAL POLICY

The Managing Director recognises that continued success and growth of the company can only be sustained by continually improving the way customer expectations and needs are translated into excellent levels of service and compliance both on and off site. Our purpose and strategic direction have been aligned with the business context in which we operate.

Customers can expect that projects will be effectively managed to ensure completion of works on time and within budget and compliant with Environmental legislation, the requirements of this Environmental Management System and other applicable requirements.

Kings Landscapes is a Commercial Landscaping contractor operating throughout the United Kingdom.

We are committed to the ideals and practices of environmental responsibility through measures designed to minimize the negative impact of the companies' activities on the environment.

A process of continual improvement in environmental performance through waste reduction, reusing and recycling on site, preventive measures against pollution, minimising energy consumption will help reduce the environmental impact on all the company operations.

Kings Landscapes are committed to:

- Establishing an Environmental Management System (EMS) to the requirements of BS EN ISO 14001, continual improvement of the Environmental management system and maintain it to our administrative and contract works.
- Develop site specific environmental plans through site inspections to ensure that all legal/customer/stakeholder requirements are fully met.
- Implement this policy through a comprehensive plan with measurable/achievable goals with targets. Accountability will be defined and adequate resources allocated.
- Demonstrate conformance to third parties and external certification.
- A review shall be under taken every year analysing the performance to agree new targets, to reduce the environmental impact on our work.
- Wherever possible influence sustainable and recycled products through value engineering and project design offering solutions that shall reduce environmental impact.
- Ensure that the environmental policy statement and policy is accessible to all employees, and clients.
- Promote good environmental practice, performance, and awareness of our environmental policies and issues amongst suppliers and sub-contractors.
- Providing information through training, tool box talks etc to personal to all levels, including sub contractors working on our sites.
- Ensure that the environmental statement is accessible to the General Public.
